PROFESSIONAL SUMMARY

Soil Scientist, Full-Stack Web Developer and Data Analyst with teaching experience

I am a Soil Science graduate of the University of Nigeria, Nsukka, and a full-stack web developer and data analyst who has also taught students. My degree trained me in statistics, data analysis and research methods, and since 2019 I have put that grounding to work in marketing, ICT management, health-data volunteering, web development and the classroom, including my NYSC year as a secondary school teacher. In every one of those roles I was the person who kept the records straight, turned raw figures into reports people could act on, and explained things clearly to colleagues, students and clients.

My core strengths are accuracy, clear communication and reliability. I work well without supervision, learn new tools quickly and finish what I start.

Teaching gave me patience and the habit of explaining one idea several ways. Marketing taught me to listen to customers, and data work taught me that small errors add up. Together they make me a dependable all-rounder who settles quickly into an office, a school or a project team, and who is happy to take on whatever the job needs.

EDUCATION

University of Nigeria, Nsukka

Nsukka, Enugu State • 2014 – 2021

B.Sc. Agriculture (Soil Science)

- Statistics, Data Analysis and Research Methodology alongside the core soil science and agriculture modules.
- Courses in experimental design, data interpretation and research reporting.

Universal Comprehensive Secondary School

Nsukka, Enugu State • 2006 – 2012

Senior Secondary Certificate
NECO and WAEC

CORE STRENGTHS

- Record-keeping and data entry
- Report writing and data analysis
- Teaching and staff training
- Sales, marketing and customer care
- Microsoft Office and Excel
- Research and statistics
- ICT support and troubleshooting
- Clear written communication
- Teamwork and process improvement
- Working independently
- Learning new systems quickly

KEY ACHIEVEMENTS

- Completed the NYSC year and earned my Certificate of National Service, teaching two subjects to two different age groups on my own.
- Turned daily sales records into reports that guided pricing and restocking, while revenue grew steadily over three years.
- Got an entire sales team recording data the same way, which cut errors and made month-end far less painful.
- Built five websites from scratch, including an online pharmacy store with an admin area its owners can run themselves.
- Developed a bill-payment platform covering airtime, data, electricity, TV and more.
- Ran a school ICT unit day to day as the first call for staff tech problems.
- Cleared over 3,700 spam and phishing messages from a live pharmacy site and closed the three entry points they came through.
- Completed four data analysis projects, from a 92-match World Cup study (3 data-entry errors caught) to a 100,000-record student dropout analysis.
- Completed the Google Data Analytics Professional Certificate (Coursera).

WORK HISTORY

Full-Stack Web Developer and Data Analyst

Abuja, Nigeria • 2019 – Present

- Designed and built websites for Renacido Pharmacy (live), C.Zara Enterprise (live demo) and MedKings Pharmacy (offline: the owner's hosting expired), with an admin area the Renacido owners run themselves.
- Built Nethub, a bill-payment platform for airtime, data, electricity, TV subscriptions and other everyday payments; it is complete and waiting for a domain and hosting.
- Added a live chat between customers and a pharmacy's admin team, with email alerts, so customer messages no longer go unanswered.
- Kept live pharmacy sites healthy after launch: repaired errors, sped up slow pages, closed a security gap and removed over 3,700 spam messages, so the owners could keep trading.

SUBJECTS I HAVE TAUGHT

Computer Science | Agricultural Science | Physical & Health Education | Microsoft Office | Introductory Programming

TECHNICAL SKILLS

DATA

SQL | Excel | Google Sheets | Tableau | Power BI | R | Data Cleaning | Star-Schema Modelling

WEB

HTML | CSS | JavaScript | PHP | MySQL | React | Git | Web Hosting

HEALTH DATA SYSTEMS

EMR | NMRS | NDR | RADET

OTHER

Digital Marketing | Research Methodology | ICT Support & Maintenance

CERTIFICATIONS

- Certificate of National Service, NYSC, 2022 – 2023
- Google Data Analytics Professional Certificate, Coursera / Google, 2023
- Web Development, Digital Dreams ICT Academy, Enugu, 2023

- Cleaned and analysed data, built dashboards and wrote reports with recommendations across four completed analysis projects.
- Worked directly with business owners and delivered without being chased.

Skills used: full-stack development, data analysis, client communication, problem-solving

---

Samkings Secondary School - Computer Science Teacher

Jikwuoyi, Abuja – FCT • 2025

- Taught Computer Science to junior and senior classes: computer basics, Microsoft Office and some introductory programming.
- Planned lessons differently for each group depending on their level, while staying in line with the national curriculum.
- Helped many students who had never used a computer before build skills they could carry into their other subjects.

Skills used: lesson planning, curriculum alignment, teaching ICT to beginners

---

Holy Spirit Secondary School - Corps Member, Teacher (NYSC)

Ebenebe, Anambra State • Feb 2022 – Feb 2023

- Taught Agricultural Science to senior students, covering crop production, soil science and farm management, using what I had studied in my degree.
- Also taught Physical and Health Education to junior students, balancing classroom theory with practical outdoor sessions.
- Covered two subjects and two very different age groups all year, on my own.

Skills used: subject knowledge, lesson planning, managing two age groups, independence

---

Samez Paints and Chemicals - Marketing Manager

Nsukka, Enugu State • Jan 2019 – Feb 2022

- Ran marketing for the company's paint and chemical product lines, and revenue grew steadily over my three years there.
- Tracked daily sales in Excel and turned them into regular reports that management used to follow performance trends and stock movement.
- Spotted patterns in the sales data and took them to management, which fed directly into pricing and restocking decisions.
- Got the whole team recording data the same way, which cut down on errors and made month-end a lot less painful.

Skills used: marketing, sales reporting in Excel, trend analysis, team coordination

---

ICT Department - ICT Manager

Nsukka, Enugu State • 2020

- Ran the ICT unit day to day: fixing computers, troubleshooting software and being the first call whenever staff had a tech problem.
- Handled data entry and record-keeping, and kept files accurate and consistent.
- Trained staff on using computers and our internal systems.

Skills used: IT support, troubleshooting, staff training, record-keeping

---

Bentevi Pharmacy / IHVN - Data Management Volunteer

Karu, FCT • Jan 2019

- Kept patient records and files accurate and well organised in a healthcare setting.
- Helped prepare monthly retirement forms following IHVN's guidelines and reporting rules.
- Worked with EMR, NMRS, NDR and RADET, the health data systems used for reporting.

Skills used: records management, following reporting guidelines, health data systems

KEY SKILLS & EXPERTISE

WEB & SOFTWARE

Full-Stack Development · PHP · MySQL · JavaScript · HTML & CSS · React · E-commerce Websites · Admin Dashboards · Responsive Design · Website Security · Performance Optimisation · Web Hosting · Git

DATA, RESEARCH & REPORTING

Data Analysis · Data Cleaning · Data Visualisation · Dashboards · Statistical Analysis · Exploratory Analysis · Data Modelling · Risk Modelling · SQL · Tableau · Power BI · R · Excel · Google Sheets · Research Methodology · Report Writing · Data Management · Data Validation · Records Management · Health Data Systems

TEACHING & TRAINING

Lesson Planning · Curriculum Delivery · ICT Training · Staff Training · Computer Literacy · Computer Science · Agricultural Science

BUSINESS & COMMUNICATION

Marketing · Sales Reporting · Client Relations · Customer Service · Stakeholder Communication · Team Coordination · Process Improvement · Problem-Solving

SELECTED PROJECTS

Renacido Pharmacy - Online Pharmacy Store

renacidopharmacy.com • Client project • Delivered 2025

- Built the whole store from scratch: product catalogue, cart, checkout and order tracking, plus an admin dashboard the owners use to run it themselves.
- Added live chat with the admin team, order and welcome emails, and a secure admin login with two-step verification.
- When the site broke after launch, I tracked down the server errors myself and got it back up without the client losing business.

C.Zara Enterprise - Natural Foods Website

Client project • Live demo on GitHub Pages

- Built the business's website with Home, About, Gallery and Contact pages, a product showcase and WhatsApp enquiries, hosted live on GitHub Pages.

Nethub - Bill-Payment Platform

Built • Waiting for a domain and hosting

- Built a multi-page platform for airtime, data, TV, electricity, water, betting, education PINs and money transfers, with a customer wallet and admin control panel.

Data Analytics Projects

4 projects completed • odoekejulius.github.io

- FIFA World Cup 2026 (92 matches): cleaned the data, fixed status mismatches, caught 3 data-entry errors and built a dashboard and report on team and confederation results.
- Student dropout risk (100,000 records): ran data-quality checks, identified dropout drivers, built risk models and risk tiers, and reviewed the results for fairness.
- Social media and student wellbeing (4,500 records): checked data quality, compared usage tiers and platforms, and linked usage to wellbeing and sleep, with recommendations.
- Bestselling books (7,909 entries, 45 countries): cleaned the data, compared women and domestic authors across five countries, and tested trends from 2013 to 2022.
