EDUCATION

Universal Comprehensive Secondary School

Nsukka, Enugu State • 2006 – 2012

Senior Secondary Certificate

NECO and WAEC

University of Nigeria, Nsukka

Nsukka, Enugu State • 2014 – 2021

B.Sc. Agriculture (Soil Science)

- Coursework included Statistics, Data Analysis and Research Methodology.

PROFESSIONAL SUMMARY

ICT and Data Professional

B.Sc. graduate in Agriculture (Soil Science) with experience in teaching, ICT training, computer lab management, data management, marketing, web development and data analysis. Has taught Computer Science and Agricultural Science, managed a school computer lab, built five websites and completed four data analysis projects. Seeking ICT and data roles in government, NGOs and the private sector.

KEY ACHIEVEMENTS

- Completed the NYSC year and earned the Certificate of National Service, teaching two subjects and managing the school computer lab.
- Taught Computer Science to junior and senior classes, helping students with no computer experience build skills they could use in other subjects.
- Produced regular Excel sales reports that management used for pricing and restocking.
- Standardised data recording across a whole sales team, which reduced errors.
- Built five websites, including a bill-payment platform covering eight services.
- Completed four data analysis projects and caught 3 data-entry errors in one dataset.
- Completed the Google Data Analytics Professional Certificate (2023).

WORK HISTORY

Bentevi Pharmacy / IHVN - Data Management Volunteer

Karu, FCT • Jan 2019

- Kept patient records and operational files accurate and well organised.
- Helped prepare monthly retirement forms following IHVN's guidelines and reporting rules.
- Worked with the EMR, NMRS, NDR and RADET data systems used for reporting.

Samez Paints and Chemicals - Marketing Manager

Nsukka, Enugu State • Jan 2019 – Feb 2022

- Ran marketing for the company's paint and chemical product lines for three years.
- Tracked daily sales in Excel and produced regular reports for management on performance trends and stock movement.
- Spotted patterns in the sales data and took them to management, which fed into pricing and restocking decisions.
- Standardised how the whole team recorded data, which reduced errors and made month-end reporting easier.

Holy Spirit Secondary School - Teacher and Computer Lab Manager (NYSC)

Ebenebe, Anambra State • Feb 2022 – Feb 2023

- Taught Agricultural Science to senior students, covering crop production, soil science and farm management.
- Taught Physical and Health Education to junior students, balancing classroom theory with practical outdoor sessions.
- Handled two subjects and two age groups all year, working independently.
- Managed the school computer lab, fixing computers, troubleshooting software and helping staff and students with technical problems.

CERTIFICATIONS

- Certificate of National Service, NYSC, 2022 – 2023
- Web Development, Digital Dreams ICT Academy, Enugu, 2023
- Google Data Analytics Professional Certificate, Coursera / Google, 2023

Samkings Secondary School - Computer Science Teacher

Jikwuoyi, Abuja – FCT • 2025 (six months)

- Taught Computer Science to junior and senior classes: computer basics, Microsoft Office and introductory programming.
- Planned lessons for each class level in line with the national curriculum.
- Helped students with no computer experience build skills they could use in other subjects.

Full-Stack Web Developer and Data Analyst

Abuja, Nigeria • 2019 – Present

- Began with small online web design jobs in 2019 and now builds websites for business owners, including online stores with admin areas the owners manage themselves.
- Maintains live websites after launch, including fixing server errors, speeding up slow pages, closing security gaps and removing over 3,700 spam messages.
- Cleans and analyses data, builds dashboards in Power BI and Tableau, and writes reports with recommendations.

PROJECTS

Websites (client projects)

Built from scratch

- Renacido Pharmacy (renacidopharmacy.com, live, 2025): built an online store with checkout, order tracking, admin dashboard and live chat.
- C.Zara Enterprise (chiomafloxxy.github.io): built a complete four-page website with a product showcase and WhatsApp enquiries.
- MedKings Pharmacy: built a pharmacy website, now offline (the owner's hosting expired).
- Nethub: built a bill-payment platform for eight services; awaiting domain and hosting.

Data analysis (portfolio at odoekejulius.github.io)

Four projects completed

- FIFA World Cup 2026 (92 matches): caught 3 data-entry errors and built a Power BI dashboard, a Tableau-ready data source and a report.
- Student dropout risk (100,000 records, practice dataset): built risk models and reviewed the results for fairness.
- Social media and student wellbeing (4,500 records, practice dataset): explored links between usage, wellbeing and sleep.
- Bestselling books (7,909 entries, 45 countries): compared women and domestic authors and built a Power BI dashboard.
